The Philips Online Learning Center is pleased to offer Radiologic Technologists 1.5 free Category A Continuing Education (CE) credits for National Radiologic Technology Week® November 3-9, 2019. An Alert box with instructions on how to access the course will be posted on the Online Learning Center on Nov. 1st. Users can search the catalog for the course title. To sign up for the course, users will need to log into the OLC, select Course Catalog > Search our Course Catalog > select Title Search.

**Anatomy Refresher of the Skeletal System: Upper Extremity**

The aim of this course is to provide a refresher and comprehensive review of the skeletal anatomy of the upper extremity using colorful illustrations, labeled graphics and radiographic images. The course will include a review of bones and joints of the shoulder, elbow, arm, wrist and hand. This is a great review for anyone in the medical field.

**Learning Objectives**

After completion of this self-learning activity the participant will be able to:

- Explain the functions of the skeletal system
- Describe the types of bones
- Describe the parts of the long bone including the markings and openings
- Discuss the classification and types of joints
- Describe and identify the main structures of the bones to include the shoulder girdle, humerus, elbow joint, radius and ulna, wrist and hand
- Locate or identify the main structures of the bones of the upper limb on radiographic images

*Please note:* ARRT does not allow self-learning CE activities (e.g., Internet courses, home study programs, directed readings) to be repeated for CE credit in the same CE biennium.

**Online and live help:**

For live help call our help desk Monday - Friday, 8:00am - 6:00pm Eastern Time, press 1 for the Philips Learning Center.
